

## CERTIFICATION FOR INACTIVE IRRIGATION SYSTEM

Property Owner Name (“customer”)	Today’s Date
Property Address	Date of Last Test
Backflow Device Type	Backflow Device SN: #

---

**I hereby understand my responsibilities to protect the potable water supply as follows:**

1. The Customer is aware that the Village of Grayslake, in adhering to Section 18 of the Illinois Environmental Protection Act (P.A. 89-445, eff 2-7-96; 90-773, eff. 8-14-98) and 35 Illinois Administration Code 607.104 & 602.115, requires an annual inspection by a certified licensed cross connection (RPZ) inspector.
2. The Customer shall prevent pollutants and contaminants from entering his/her potable water supply. In order to protect the water distribution system of the Village of Grayslake (“Village”), Customer shall be responsible for ensuring that no cross connections exist without approved backflow protection within his or her premises, starting at the point of service with the Village’s public potable water system.
3. The Customer shall, at his or her own expense, cause the installation, operation, testing and maintenance of backflow prevention assemblies (“Backflow Device”). The Customer authorizes the Village to disclose Customer’s name and address to the Village’s authorized representative for purposes of administering the Village’s program of testing Backflow Devices.
4. A State of Illinois registered backflow prevention assembly technicians shall be the only one to test a Backflow Device.
5. The Customer shall ensure that copies of the records of the installation and all test and repairs made to the Backflow Device are delivered to the Village’s authorized representative within fifteen (15) days after testing and/or repairs are completed.
6. If a backflow incident occurs, the Customer shall immediately notify the Village of the incident and take steps to confine the containment or pollution.

**I hereby understand and agree that in order not to be required to test my Backflow Device for a one (1) year period because my irrigation system is inactive, I must comply with the following requirements:**

1. The Village will routinely monitor irrigation usage to determine compliance with this “Inactive Irrigation System” certification. Customer non-compliance with this Certification shall make the irrigation system subject to the Village’s backflow testing requirements.
2. Customer shall not flow water through any Backflow Device that has not been tested within three (3) months prior to use.
3. Customer shall shut off the water supply to the irrigation system by turning off valves on both sides of Backflow Device.
4. Failure of the Village to notify the Customer that the Customer has violated the terms of this Certification and has operated their irrigation system in no way relieves the Customer of any liability if a backflow or back siphoning occurs.
5. The Village may immediately deny or discontinue, without notice to the customer thereof, the water service to any premises wherein a severe cross connection exists which constitutes an immediate threat to the safety of the Village’s public water system. The Village shall notify the Customer of the denial or discontinuation of service in accordance with the terms of the Village Code.
6. The Customer’s water service to the property will not be restored until the Backflow Device has been tested.
7. This certification is good for one year, after this year the Backflow Device must either be tested or the Backflow Device must be permanently removed and the pipes on either side capped and/or removed. The Backflow Device may not be re-installed without a construction permit issued by the Village of Grayslake.

---

I hereby certify and understand that I am to maintain, in good working order, and I am to test my Backflow Device each season when my irrigation system is put into operations.

I hereby certify that I understand and agree to all conditions as outlined above, and that since I choose not to utilize my irrigation system this season, this Certification will permit me not to test the Backflow Device that is part of my irrigation system this irrigation season only.
