

Electrical Work Installed by Homeowner

A homeowner may install electrical wiring only in a residence or accessory structure that he/she owns and occupies, or will occupy as his/her home, subject to the following:

All electrical wiring installed pursuant to this permit **shall be installed only by the homeowner, without compensation or pay to any other person for such labor or installation.** Such installation shall comply with the requirements of the 2011 National Electrical Code and Grayslake Amendments to the same. The homeowner shall file plans, demonstrate to the satisfaction of the electrical inspector that he/she possesses sufficient knowledge of the code requirements and the ability to make such installation properly, apply for and secure a permit, pay the required permit fees and call for all inspections in the manner provided in the codes. Homeowner permits shall be valid for a period of six months from the date of issuance or the last inspection. No portion of the wiring installed under a permit issued pursuant to this section shall be energized until final approval is issued by the electrical inspector.

Liability to the Village: The inspector and control of the installation of electrical equipment or the granting of license by the village shall not make the village liable on account of such control of or granting of such license, or lessen the liability of persons, firms, or corporations owning or installing such electrical equipment.
